Plant Science from SDSU
- Registered Seed Technologist

**I will be stopping by to see where
you want to take your yields!**

Mobile 320.296.3218

Email rod@rcthomas.com

What do you know about **RAISING YIELDS?**

**Still trying to manage plant populations
and row spacings....STOP!**

THOSE THINGS DON'T WORK.

DO YOU HAVE A PRODUCTION PLAN?

A detailed production plan gives you more control over input costs and market prices.

Stop looking at plot data, side by side or varieties to raise yields. Those strategies are outdated.

YIELDS DRIVE PROFITS

Let's Talk

Let's answer the 3 most important questions to your farming business.

- 1. Where do you want to take your yields next year?**
- 2. What's your plan to get there?**
- 3. What's keeping you from getting there?**

I will be stopping by during harvest to visit about taking yields to new levels.
